# DFO-WCHG: Department of Fisheries Oceans Canada Haida Gwaii survey data processing summary

fishglob, Aurore A. Maureaud, Juliano Palacios Abrantes, Zoë Kitchel, Dan Forrest, & Michelle Stuart January, 2023

#### Contents

General info	-
Data cleaning in R	-
1. Overview of the survey data table	_
2. Summary of sampling intensity	6
3. Summary of sampling variables from the survey	
4. Summary of biological variables	. 4
5. Extreme values	!
6. Summary of variables against swept area	(
7. Abundance or Weight trends of the six most abundant species	,
8. Distribution mapping	8
9. Taxonomic flagging	(
10. Spatio-temporal standardization	(
a. Standardization method 1	(
b. Standardization method 2	, ,
c. Standardization summary	

#### General info

This document presents the cleaning code and summary of the West Coast Haida Gwaii (Department of Fisheries Oceans Canada) bottom trawl survey provided by Shelee Hamilton, and Maria Cornthwaite. It contains data from 2005 and up to 2019.

## 2. Summary of sampling intensity

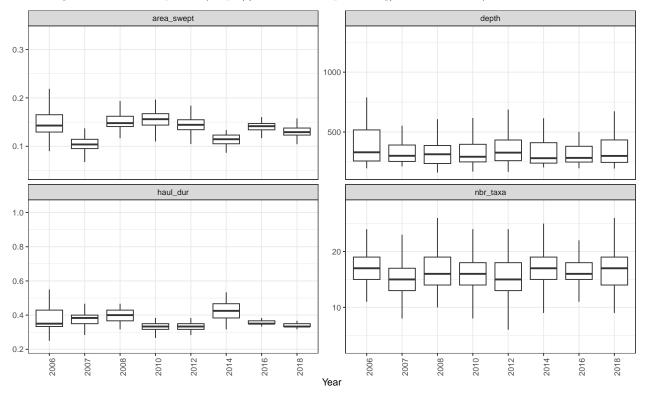

Number of hauls per year performed during the survey after data processing.

#### 3. Summary of sampling variables from the survey

Here we show the yearly total and average of the following variables reported in the survey data:

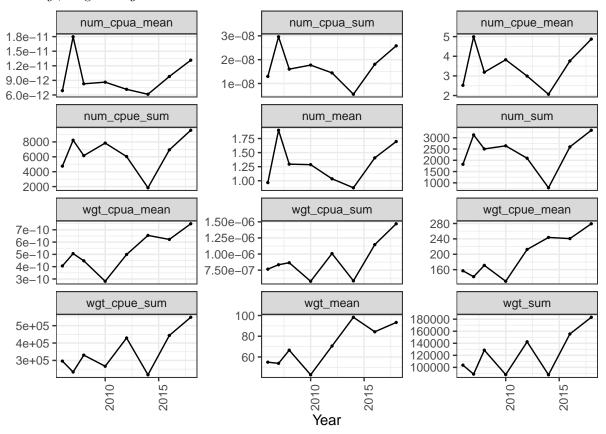

- $area\_swept$ , swept area by the bottom trawl gear  $km^2$
- depth, sampling depth in m
- haul\_dur, haul sampling duration hour
- number of marine fish taxa, taxa were cleaned following the last version of taxonomy from the World Register of Marine Species (https://www.marinespecies.org/, October 2021)

#### 4. Summary of biological variables

Here we display the yearly total and average across hauls of the following variables recorded in the data:

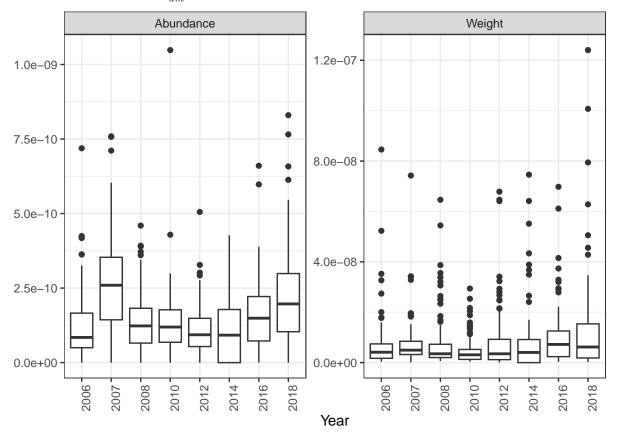

- $num\_cpua$ , number of individuals (abundance) in  $\frac{km^2}{l}$   $num\_cpue$ , number of individuals (abundance) in  $\frac{individuals}{h}$
- num, number of individuals (abundance)
- $wgt\_cpua$ , weight in  $\frac{kg}{km^2}$   $wgt\_cpue$ , weight in  $\frac{kg}{h}$
- wgt, weight in kg

#### 5. Extreme values

Here we show a yearly total distribution of the biomass data to visualize outliers:

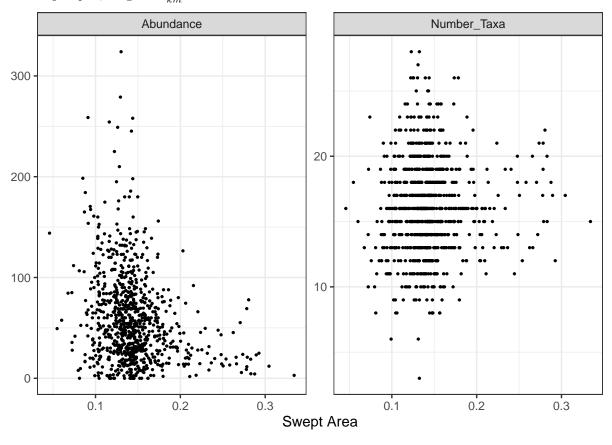

- $num\_cpue$ , number of individuals (abundance) in  $\frac{individuals}{km^2}$
- $wgt\_cpue$ , weight in  $\frac{kg}{km^2}$

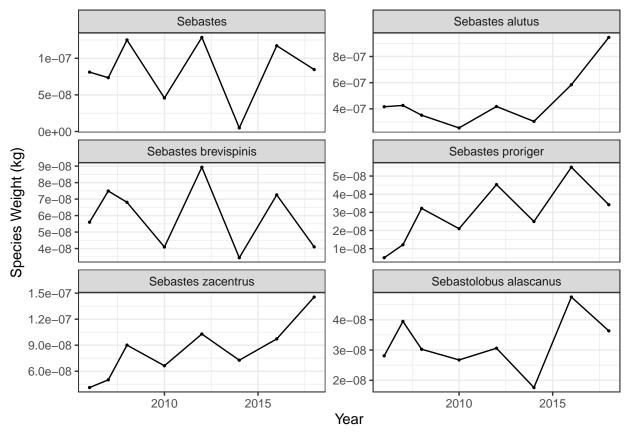

## 6. Summary of variables against swept area

Here we show the total abundance and number of taxa relationships with the area swept:

- $nbr\_taxa$ , number of marine fish taxa after taxonomic data cleaning
- $num\_cpua$ , number of individuals (abundance) in  $\frac{individuals}{km^2}$
- $wgt\_cpua$ , weight in  $\frac{kg}{km^2}$

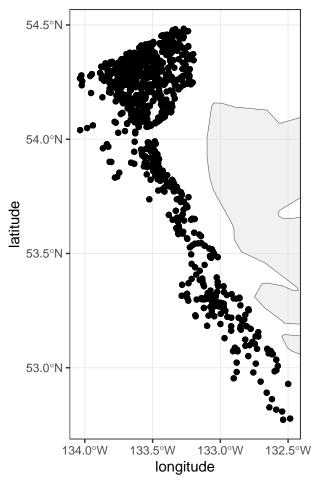

## 7. Abundance or Weight trends of the six most abundant species

## 8. Distribution mapping

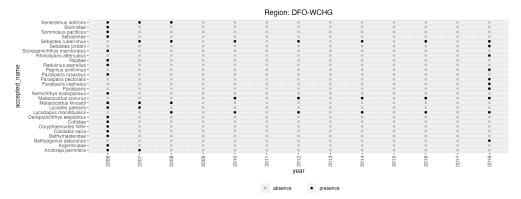

Map of the sampling distribution in space. Note that we only show one year per coordinate.

## 9. Taxonomic flagging

This species flagging method was adapted from https://github.com/pinskylab/OceanAdapt/blob/master/R/add-spp-to-taxonomy.Rmd# L33

Visualization of flagged taxa

Statistics related to the taxonomic flagging outputs

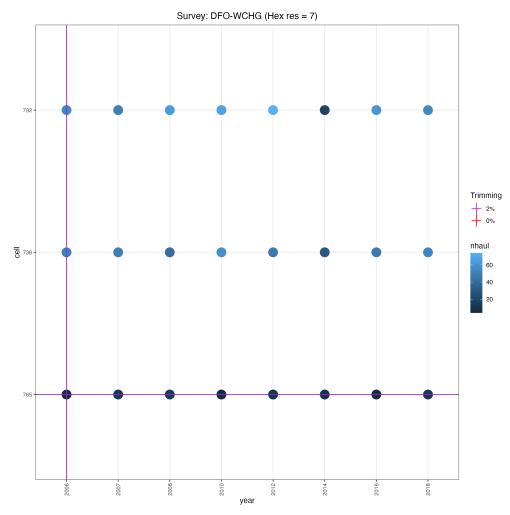

Total number of species	177.0
Percentage of species flagged	15.8

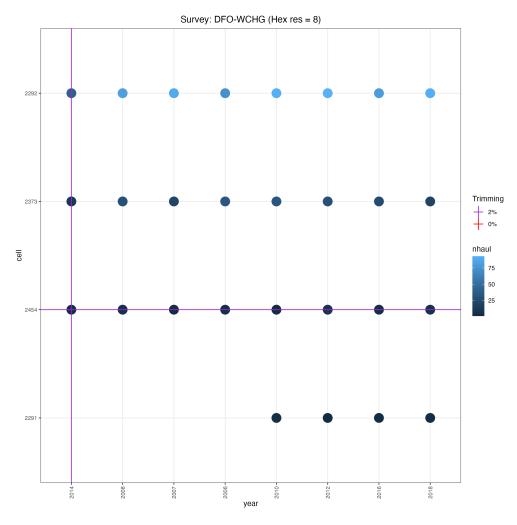

## 10. Spatio-temporal standardization

#### a. Standardization method 1

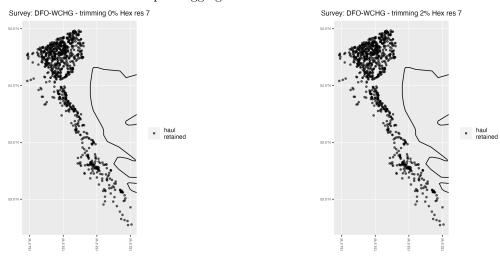

This standardization method was adapted from https://github.com/zoekitchel/trawl\_spatial\_turnover/blob/master/data\_prep\_code/species/explore\_NorthSea\_trimming.Rmd It was run for hex resolution 7 and 8.

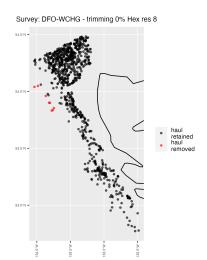

Plot of number of cells **x** years with overlaid flagging options

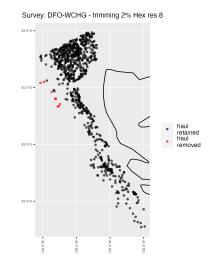

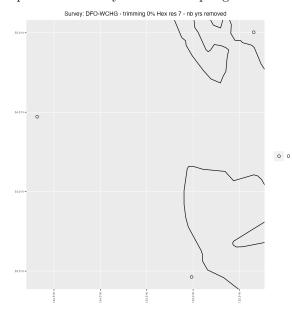

Map of hauls retained and removed per flagging method and threshold

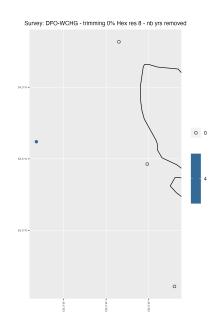

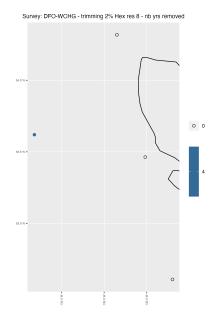

Map of numbers of years removed per grid cell and flagging method/threshold

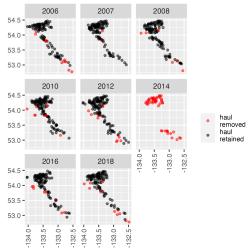

#### b. Standardization method 2

This standardization method was adapted from BioTIME code from https://github.com/Wubing-Xu/Range  $\_size\_winners\_losers$ 

Map of hauls retained and removed

survey= DFO-WCHG year1= 2007 year2= 2018 max.shared.samples= 99 duration= 12

#### c. Standardization summary

Statistics of hauls removed for each standardization method

summary	grid cell 7, 0% threshold	grid cell 7, 2% threshold	grid cell 8, 0% threshold	grid cell 8, 2% threshold	method 2 (biotime)
number of hauls removed	0	0	8.0	8.0	1937.0
percentage of hauls removed	0	0	0.9	0.9	13.6
